LEADER IN THE INNOVATION OF POWER MANAGEMENT AND PRECISION ANALOG ICs

Intersil is leveraging a deep portfolio of intellectual property, a history of design and process innovation and a system-level view to add intelligence, mobility and true energy efficiency to the latest electronic systems. Intersil has developed market leadership in power management and precision analog technology for many of the most rigorous applications in the computing, consumer and industrial markets. The company supplies a full range of power IC solutions including battery management, computing power, display power, regulators and controllers and power modules; as well as precision analog components such as amplifiers and buffers, proximity and light sensors, data converters, timing products, optoelectronics and interface products.

As a major supplier to the military and aerospace industries, Intersil’s product development methodologies reflect experience designing products to meet the highest standards for reliability and performance in challenging environments.

At Intersil, we believe people make the difference. We’re always actively recruiting talented people who thrive on innovation. Our values form the foundation for our culture:

OUR VALUES

Meet Commitments  We are results oriented and we are accountable to each other, our customers, and our investors to deliver on our commitments.

Open Communication  We promote transparency and believe in open, honest communication through thoughtful and mutually-respectful dialog.

High Caliber Talent  We hire talented people and reward functional excellence. We value everyone’s contribution regardless of their function or title.

Will To Win  We are determined to beat the competition, and we act with a sense of urgency to win. We strive to create sustainable competitive advantages.

Commercial Success  We believe that innovation is the foundation of a successful company, and that commercial success is the absolute measure of our achievements.

INTERNSHIP PROGRAM

At Intersil, interns are an important part of the team. When you sign on for an internship, you’ll be working on critical projects, have exposure to corporate leaders, gain hands-on experience and so much more. Intersil’s internship program is for students obtaining an undergraduate, graduate or PhD degree.

As part of the internship program, Intersil offers the following opportunities:

- 12 week internships available in California, Florida, New Jersey, New York, North Carolina, and Texas
- Hands-on-learning
- Constructive feedback from your manager and team
- 1:1 mentoring
- Opportunities to share what you’ve learned and teach your team
- Fun intern events

ENTRY-LEVEL OPPORTUNITIES

Intersil is committed to hiring and transitioning new graduates from the academic field to the corporate world. Beginning on day one, you are an important, involved and valued contributor of the team. We are looking for high energy, inquisitive individuals who have new ideas to solve challenging problems.

Intersil offers opportunities across the country in California, Florida, New Jersey, New York, North Carolina and Texas to recent Bachelor’s Master’s and PhD graduates.

As an entry level employee, you can expect the following:

- 1:1 mentoring
- Valuable industry experience
- Exposure to exciting technology
- Networking opportunities with experienced engineers throughout the company
- Visa sponsorship (if applicable)
