

## Declaration of Conformity

### EPEAT / IEEE 1680

The Electronic Product Environmental Assessment Tool ("EPEAT") is a tool to help governmental and institutional purchasers select environmentally preferable laptop and desktop computers and monitors by implementing the IEEE 1680™ - 2006 Standard for Environmental Assessment of Personal Computer products (including laptop and desktop computers, and monitors).

To qualify for registration as an EPEAT product, the product must conform to all the required criteria found at <http://www.epeat.net/Criteria.aspx#criteriatable>

Intersil has determined that its integrated circuits designated as Pb-free/RoHS compliant meet the 23 required criteria, as applicable, and also qualify for the Gold environmental performance rating pertaining to the 28 optional criteria, as applicable.
